

Europe 2020: Mobility of Researchers as a key aspect for career development

Fulvio Esposito - University of Camerino (IT)

Chair

ERA Steering Group on Human Resources and Mobility (SGHRM)

Presentation given at the

I-SEEMob Conference

*Fostering inter-sectoral mobility of researchers in SEE:
Challenges and driving forces*

EUROPEAN
COMMISSION

European
Research Area

The history of mobility of researchers
(with a special emphasis on inter-sectoral
mobility)
in the EC 'key policy documents'

EUROPEAN
COMMISSION

European
Research Area

Commission Recommendation of 11 March 2005
on the **European Charter for Researchers**
and on a **Code of Conduct for the Recruitment**
of Researchers...

Inter-sectoral mobility quoted 3 times

EUROPEAN
COMMISSION

European
Research Area

...Even though Member States have made considerable efforts to overcome administrative and legal obstacles to geographical and **inter-sectoral mobility**, many of these obstacles still remain.

[Therefore the EC recommends]... That Member States continue their efforts to overcome the persisting legal and administrative obstacles to mobility, **including those related to inter-sectoral mobility** and mobility between and within different functions...

Most important, under 'Principles and Requirements'...

Value of mobility

Employers and/or funders must recognise the value of geographical, **inter-sectoral**, inter- and trans-disciplinary and virtual mobility as well as mobility between the public and private sector as an important means of enhancing scientific knowledge and professional development at any stage of a researcher's career...

(cont'd)

EUROPEAN
COMMISSION

European
Research Area

Consequently, they should build such options into the specific career development strategy and fully value and acknowledge any mobility experience within their career progression/appraisal system.

This also requires that the necessary administrative instruments be put in place to allow the portability of both grants and social security provisions, in accordance with national legislation.

EUROPEAN

Commission Communication of 6 October 2010
on the Europe 2020 Flagship Initiative

Innovation Union

mobility across sectors quoted 3 times

Innovation Union Commitment n. 4...

In 2012, the Commission will propose a European Research Area framework and supporting measures to **remove obstacles to mobility** and cross-border cooperation, aiming for them to be in force by end 2014.

They will notably seek to ensure through a common approach:

- quality of doctoral training, attractive employment conditions and gender balance in research careers;
- **mobility of researchers across countries and sectors**, including through open recruitment in public research institutions and comparable research career structures and by facilitating the creation of European supplementary pension funds...

EUROPEAN
COMMISSION

European
Research Area

The political will is there...

The **concrete actions?**

(EU universities and Res. Inst., ERC, FP7, MCA...)

EUROPEAN
COMMISSION

European
Research Area

BUT pleas for more and better valued mobility
must be **evidence-based**:
statistics
case studies/success stories...

Provided that it is adequately valued and 'administratively' supported (portability of grants and of social security provisions, dual careers measures...),

mobility (particularly inter-sectoral) is good *per se*, as

- it increases competitiveness of the individual, thus favouring employment and career progression,
- it benefits the research institution, as it implies open recruitment and equal opportunity employment conditions,
- it boosts inter-sectoral co-operation (especially **between industry and academia**), which is crucial, especially in time of fiscal constraint!!!

EUROPEAN
COMMISSION

European
Research Area

Therefore, our researchers, especially the younger stratum (those we call in the EFRC ‘first stage researchers’) should always, without reservations, **encouraged to undertake these experiences**

EUROPEAN
COMMISSION

European
Research Area

ISEE-Mob can do a lot for promoting
more and better valued **mobility**;
its conclusions & findings may apply beyond SEE,
so, on behalf of the ERA Steering Group on
Human Resources and Mobility
THANKS!
