

TRIPLE-HELIX CONFERENCE ON BIO-BASED ECONOMY

Supporting the development of bio-based economy partnerships in the Danube

Region through a triple-helix approach

19, 20 July 2016, Budapest, Hungary

Objectives

The “Triple-Helix Conference on Bio-Based Economy” is one of the major events of the Danube-INCO.NET project. Its main objective is to support the university-business-government cooperation (triple-helix model) to enhance the establishment and development of bio-based economy partnerships in the target countries, tackling societal challenges in the field of food security, sustainable agriculture and forestry, water research, bio-based economy and bio-energy.

Details

Target groups of the conference are interested participants from academia, government and businesses across the Danube Region. The aim is to gather all relevant actors working in the identified societal challenges and support them in networking and establishing long-term dialogue among them.

The conference will envisage a plenary round table and three parallel sessions (on food, materials and environmental technologies and energy) during the first day, while a brokerage event to facilitate matchmaking between researchers, industry and government will be organised in the morning of day 2. It will be a unique possibility to link up participants with a special view of finding partners for upcoming calls.

Back to back with the conference, the Danube-INCO.NET 4th Clustering Workshop will be organized, aiming at the formation of new macro-regional partnerships towards the development of bio-based economy, with particular focus on linking challenge-oriented research, innovation networks, industry and government.

Venue

Danubius Hotel Gellért, H-1111 Budapest, Szent Gellért tér 1., Hungary

Organizer

Regional Centre for Information and Scientific Development
